

# WHY IS THIS IMPORTANT?

Students Demand  
Latest Technologies

Common Core  
SBAC

Need to  
Stay Current

Need a  
Direction/Vision

Must Keep up  
With Mobility Demands

Keep and  
Recruit Top Talent

## HOW DO WE GET THERE?

### MANAGEMENT

- Anytime, anywhere management.
- Need network administrator and technology facilitator (not always the same person)

### CURRICULUM

- We can't let technology drive curriculum, curriculum must drive technology.

### INFRASTRUCTURE

- We must build the foundation for our IT strategy
- Avoid the Charlie Brown Christmas tree!

### APPLICATIONS

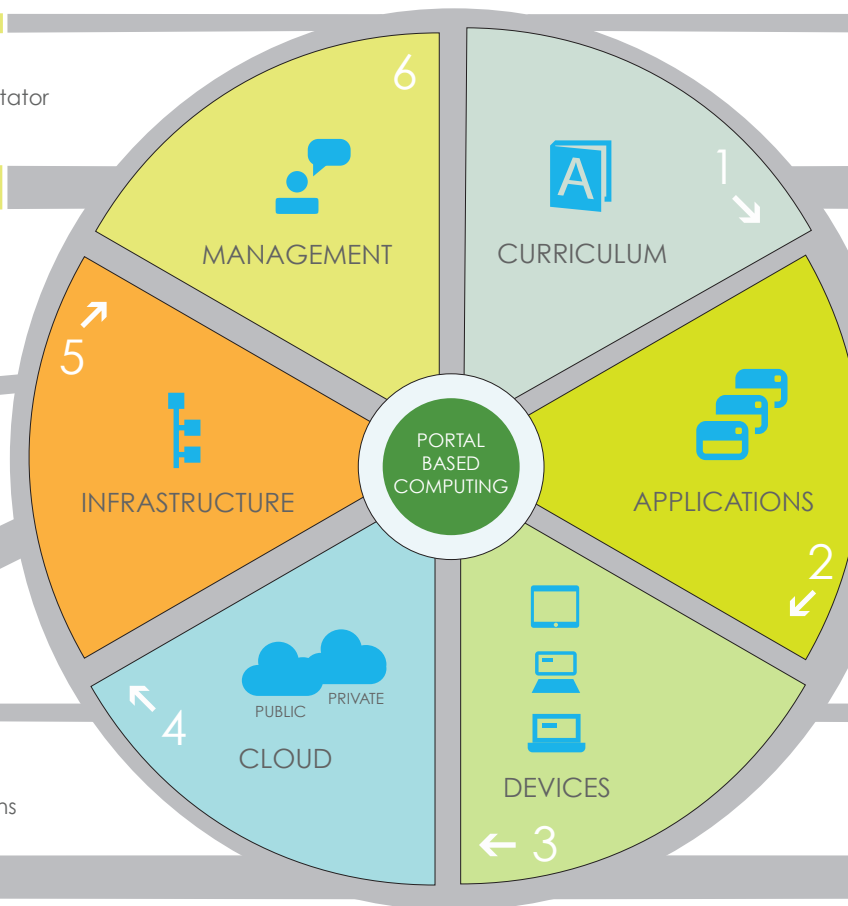

- Choose applications based upon curriculum goals
- How do we plan to access these applications?

### CLOUD

- What do we define as the cloud?
- Define strategy for public and private cloud solutions

### DEVICES

- Must be able to provide the same environment on every device to every student
- Must control and manage device sprawl
- How are we controlling and securing the devices?

# STEPS TO SUCCESS
